
Seminar Synopsis

Travel Arrangements: Airline tickets for your clients will be coordinated and purchased by Aqua-Aerobic Systems and will include ground transportation.

Lodging: Overnight accommodations will be provided by Aqua-Aerobic at a local hotel the evening prior to the seminar.

Meals: You and your clients will be Aqua-Aerobic Systems' guest for dinner the evening prior to the seminar. Breakfast and lunch the following day will also be provided.

Program: The Process and Product Application seminar is a full day program featuring presentations on Biological Processes, Cloth Media Filtration, Membranes and Controls. Project Workshops are designed to meet the objectives of a specific project and typically last morning to early afternoon.

Note: For additional information including brochures, associated rep fees and on-line registration links, please log in to the Rep Portal at www.aqua-aerobic.com.

Regional Seminar Program

- Aqua-Aerobic identifies a specific need in a territory (i.e. low level nutrient)
- Conducted within a rep's territory anytime throughout the year
- Topic and product focus are determined by the rep and Regional Manager, and supported by Product Management
- When appropriate Aqua-Aerobic may perform a pilot study to prove our technology is capable of meeting the objective(s); we would present study results in addition to our existing knowledge
- Attendees are typically engineers and plant operations staff within driving distance of the designated location
- All coordination of the seminar is conducted through Aqua-Aerobic Systems' Marketing department
