RE: AquaNereda® Rental Unit Available

---

Dear Aqua-Aerobic Representatives:

The **new AquaNereda® Aerobic Granular Sludge Rental Unit** is ready to “hit the road” and provide your customer with advanced secondary treatment in a quickly deployable package!

The unit is capable of producing high quality secondary effluent from a screened and de-gritted influent source. Couple the system with tertiary filtration using the AquaDisk® cloth media filter and get the most advanced and effective wastewater treatment.

## Operating & Design Information

Hydraulic Capacity 50,000-80,000 GPD

## Effluent Achievable

BOD 10 mg/l, TSS 15 mg/l, NH4-N 1 mg/l,  
TN <10 mg/l, TP 1 mg/l.

## AquaNereda® Rental Unit Applications:

- Temporary treatment during plant construction, expansion or upgrading
- Emergency treatment due to unforeseen circumstances i.e. natural disasters
- Low-impact method to quickly increase treatment capacity if current system is at capacity
- Quickly meet regulatory requirements sooner than building permanent infrastructure

**See the attached data sheet for more details!**

## WHO TO CONTACT:

Please contact me directly if you have questions or would like to discuss a potential application for this rental unit.
