

# Aqua ElectrOzone®

## Ozone Generation System

**Aqua ElectrOzone® Installation:**  
Wylie WTP at Wylie, TX  
One of the World's Largest Drinking  
Water Plants Using Ozone

## A RELIABLE SOLUTION WITH A PROVEN TRACK RECORD

Next generation MicroGap™ core technology

The Aqua ElectrOzone® ozone generation system is a proven and efficient solution for water, wastewater, and industrial applications, including taste and odor control, color removal, oxidation, and disinfection. Featuring advanced MicroGap™ core technology, the system includes precision-engineered electrodes that ensure efficient ozone production, minimized lifecycle costs, and a compact footprint.

Aqua ElectrOzone® systems are built for long-term reliability. Partner with Aqua-Aerobic Systems for a lifetime of support and expertise, ensuring your plant's success and sustainability.

### ADVANTAGES OF THE TECHNOLOGY:

- Robust design for long life dependability
- Power savings with reduced discharge gap
- Low harmonics with solid state pulse width modulation power
- Low O&M costs and simple to operate
- More than 800 installed units, worldwide
- Compact generator vessel
