

---

## Features/Benefits

- Available in 10 hp and 40 hp sizes
- Direct-drive mixer
- Endura® Series high efficiency motor
- No blowers or diffusers needed
- Floating unit offers easy access and operates in varying water depths
- High oxygen transfer provides operational cost savings
- Independent aeration and mixing offers full oxygen control for process optimization
- Completely mixed conditions provide enhanced process conditions

Illustration of the mixer's regenerative mixing pattern.

- Oxygen is injected through a proprietary gas injection device at multiple points below the unit's impeller where liquid velocities are highest
- Mixer provides even distribution of oxygen throughout the basin
- Combination of the injection device and mixer allows for maximum residence time for efficient oxygen transfer
