## Aqua MiniDisk® CLOTH MEDIA FILTER

### Features/Benefits

- Enhanced performance achieves low TSS and phosphorus
- Up to 10 vertically oriented disks on a center tube
- Each disk has two lightweight, removable segments for easy maintenance
- Low hydraulic profile
- High solids and hydraulic loading rates
- Minimal operating and maintenance costs
- Fully automatic PLC control system
- Painted steel, stainless steel or concrete tanks
- Retrofit existing 9 ft. (2.74 m) wide concrete traveling bridge filter basins, providing more than two times the hydraulic capacity of the original sand filters

### Aqua MiniDisk® Modular Retrofit
