A Metawater Company

Sell Your Used or Unwanted Equipment

Aqua-Aerobic® Buy Back Program

As many municipalities experience tightening budgets, often they look for alternative revenue sources by selling used and unwanted equipment. Aqua-Aerobic Systems offers our customers a program that allows you to sell back Aqua-Aerobic® equipment and components such as aerators, mixers, decanters and cloth media filters. Our buy-back program is flexible with three easy options: 1) Trade-in for new or reconditioned equipment, 2) Credit for existing or future equipment, and 3) Direct buy-back with payment by check.

Fiberglass or Stainless Steel Floats

Stainless Steel Diffusion Heads

Decanters

Cloth Media Filters

How the Program Works

E-mail several photos of your equipment with a brief description to the respective Aqua-Aerobic Customer Service Representative listed below. Include the quantity, materials of construction, and if applicable, the horsepower. Also indicate what "Buy-Back" option you prefer. Upon our review of the photos and information provided, we will contact you to discuss the potential buy-back option.

Program Benefits

A scrap yard will pay pennies on the dollar for your unwanted equipment or even refuse to accept the equipment. Selling your equipment back to Aqua-Aerobic has several benefits:

- Receive a premium for your equipment and a source of revenue to help ease your budget constraints.
- Eliminate freight costs as we will arrange for transportation at no cost to you.
- Reduce your inventory while you create space needed for required equipment.
- No equipment disassembly is required as units can often be shipped complete.

We look forward to working with you to convert your used or unwanted equipment into a source of revenue.

Approved Buy Back Equipment Includes:

Aerators and Mixers

- Complete Units
- Motors
- Power Sections
- Floats
- Diffusion Heads

Cloth Media Filtration

- Complete Units
- Cloth Media Frames
